

One Week Summer School On Behavioural Finance

Behavioural finance is an emerging area of study which considers the theories based on psychology to elucidate the anomalies in the financial market. Of late there are lots of researches happening in the field of behavioural finance. The development of technology has made accessible the information for the general public. Any information is available to the investors at a relatively faster rate than ever before. With the advent of online trading, the volume and value of transactions in the stock market

have increased tremendously. The investor is now more active as well as reactive. In this back drop, it is strongly felt the need to get answers to some questions regarding the behaviour of the stock market and the investors. The natural conclusion is that it will lead to study and research in the field of behavioural finance.
