HERE ARE THE TOP FIVE DRIVERS OF CHANGE:

1 Job seekers to job providers: While the IITs attracted the best talent from all over the country to its programmes, they were largely successful in churning out graduates who were job seekers rather than job providers. Though exceptions exist in terms of over a dozen unicorns created by the IIT alumni, one must keep in mind that many of these unicorns were created by the alumni on foreign soil. It is also true that India for a long time lacked the ecosystem for start-ups and mainly survived on imported goods and technologies. This is changing. For example, one in four students at IIT Delhi is keen to start a company after graduation. This has necessitated the institute to undertake major changes in the curriculum and bring in more and more 'minor' programmes covering diverse streams of engineering, courses on economics, deferred placement schemes, student start-up schemes, multi-disciplinary training modules, etc. The institute is also in the process of launching a Minor Programme in Entrepreneurship. In addition, multiple society-connect initiatives were launched to expose students to problems in the real world. Immersion programmes, where students get to work in diverse environments such as hospitals, rural areas and industries, were also undertaken. Creativity is about connecting the dots, and exposing students to diverse experiences and environments is a key requirement to instil confidence in them so that they can chart their own course in life. Faculty mentorship plays a major
